Exercise 4a – Task Analysis for an app using LucidChart

AIM:

The aim of this exercise is to design a flowchart using **Lucidchart** that represents the navigation flow of a food delivery application. The flow includes different stages such as browsing, searching, adding items to cart, login, checkout, payment, and order completion.

TOOLS USED:

● Lucidchart (https://www.lucidchart.com/)

PROCEDURE: Food Delivery App Flowchart

Step 1: Planning the Flowchart

- Identified the main steps involved in the food delivery application:
  - Browsing & Searching food
  - Selecting products
  - Adding to Cart
  - Login/Register
  - Checkout & Payment
  - Order Confirmation
- Planned a logical flow connecting all these steps.

Step 2: Creating Lucidchart Document

- Logged into the Lucidchart platform
- Created a new blank document
- Selected flowchart shapes for designing

Step 3: Designing Flowchart Components

1. Start and Home Screen

- Added a **Start** symbol
- Created **Home Screen** process
- Connected to:
  - View Categories
  - Search and Results

2. Browsing and Searching

- Added:
  - Categories → View Categories
  - Product List → View Items
  - Search and Results
- Linked these to **Product Details**

3. Product Selection

- Created **Product Details → Select Products**
- Connected to **Adding to Cart**

4. Cart Section

- Added:
  - Adding to Cart → View Cart
  - Cart → View Cart
- Connected cart to login process

5. Login / Register

- Added:
  - Login or Guest → Login/Register
- Connected to checkout stage

6. Checkout Process

- Created:
  - Checkout → Enter Shipping and Payment
  - Checkout → Process Payment

7. Payment Flow

- Added:
  - Payment → Process Payment
  - Payment Failed
  - Payment Confirmed
- Connected:
  - Success → Order Confirmed
  - Failure → Retry or exit

8. Order Completion

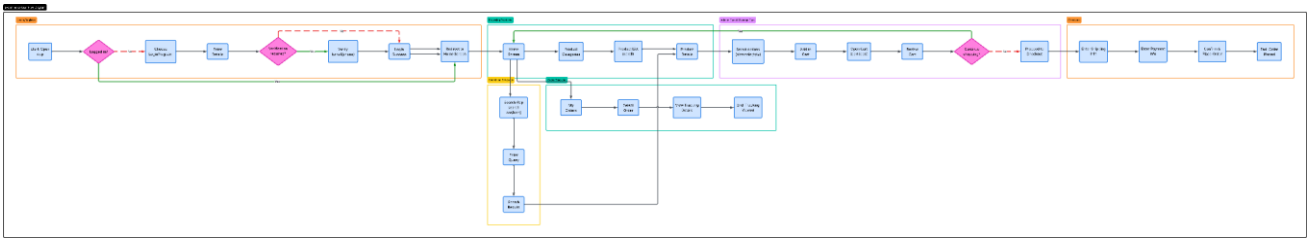
- Added:
  - Order Confirmed
  - End – Order Placed
- Connected to post-purchase actions

Step 4: Linking the Flowchart

- Connected all steps using arrows:
  - Home → Categories/Search
  - Products → Cart
  - Cart → Login
  - Login → Checkout
  - Checkout → Payment
  - Payment → Order Completion
- Ensured smooth and logical navigation

Step 5: Organizing Flow Sections

- Divided flow into categories:
  - Browsing & Searching
  - Account & Cart
  - Payment
  - Checkout & Post-Purchase
- Used different colors for clarity



RESULT:

A flowchart was successfully created using Lucidchart representing the complete workflow of a food delivery application. The flow clearly shows the user journey from browsing food items to placing an order and completing payment.
