EXPERIMENT 7

ROLL NO: 240701186
NAME: HARSHNI K

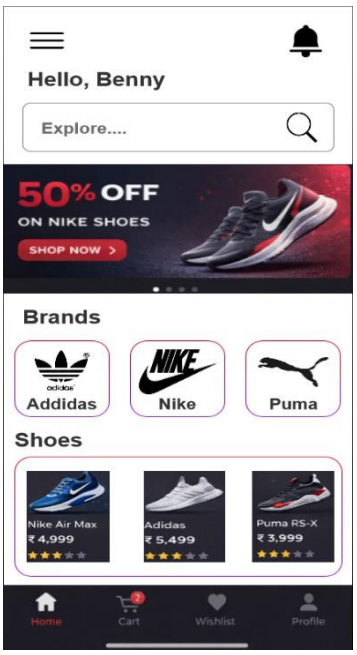
Aim

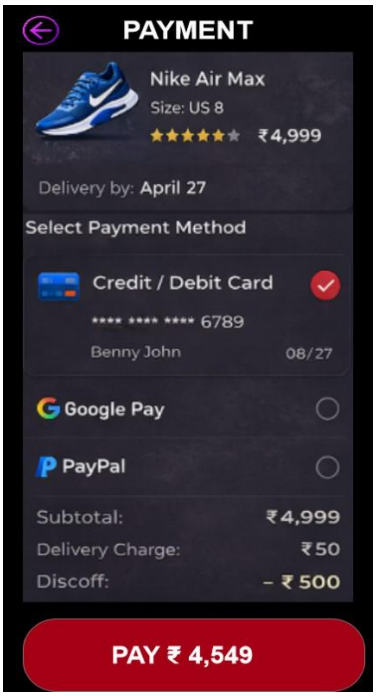
To design an application layout using different color schemes, text styles, and visual elements, and to evaluate user feedback on aesthetics and usability.

Tools Used

- Axure
- GIMP
- Google Forms (for feedback collection)

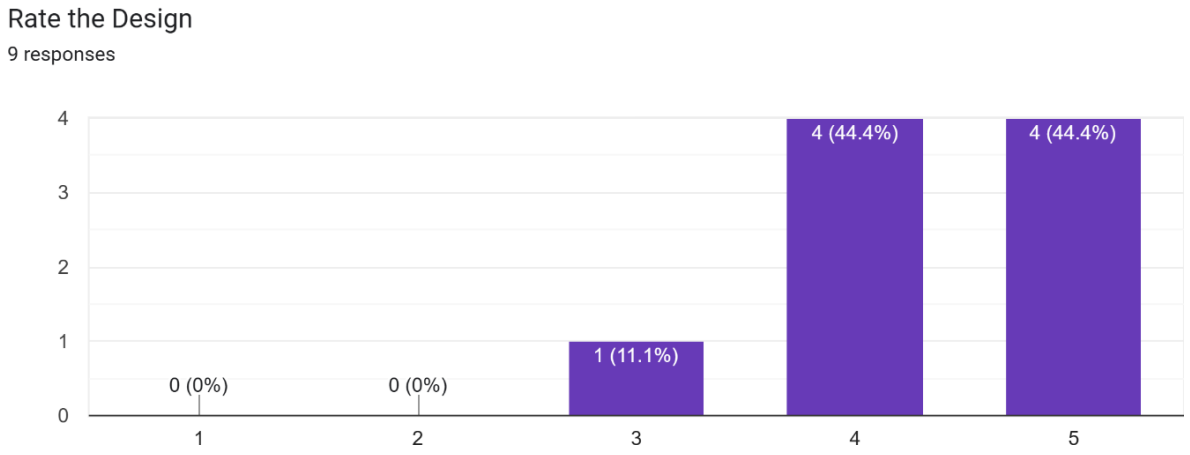
BEFORE FEEDBACK THE SPORTX TRINITY APP





Feed Back Section

1. Rate the Design



2. Collected FeedBack from Users:

Suggestions for Improvement

7 responses

Email spelling is wrong in login page
Login page background could've been better

Colours could be changed for better intuition

In third screen thers is buy now option but there is not add to cart opiton so if there is an add to cart option it will be more useful so that i can view later and also i can buy

Good job keep it up!!

None

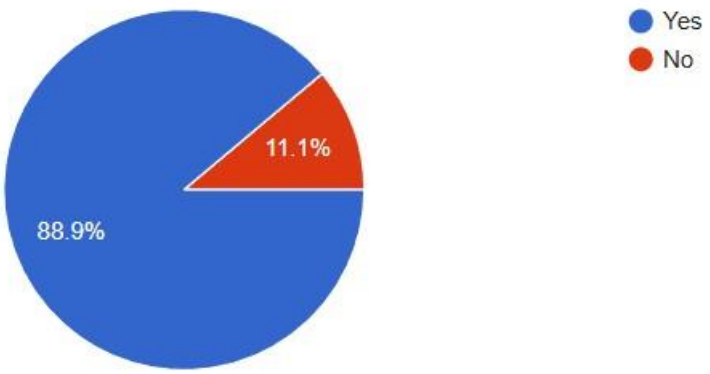
The app looks like it is a sneaker shop but the name is mentioned as sportx the name can be changed from sportx to Sneakers Trinity

The notification icon is big, it can be made smaller.

3. Navigation part feedback Rating (by pie chart):

Is the app easy to navigate

9 responses

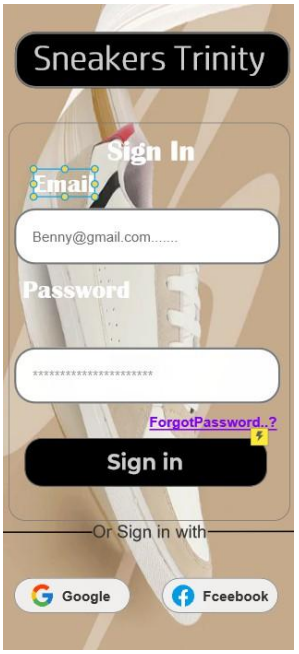


After feedback

FEEDBACK-01:

Email spelling is wrong in login page
Login page background could've been better

The app looks like it is a sneaker shop but the name is mentioned as sportx the name can be changed from sportx to Sneakers Trinity



Before After

Feedback-02:

In third screen thers is buy now option but there is not add to cart opiton so if there is an add to cart option it will be more useful so that i can view later and also i can buy

Here I have recived a feedback like there is no ADD TO CART button so I have added it in this screen 3

Before

After

The three main changed have been done...

Finally App design after the feedback recived form the users:
