EXPERIMENT – 3

NAME:HARSHNI K ROLL NO: 240701186

USER INTERFACE AND DESIGN

Ex. No. 3a Prototype with Navigation using Proto.io

EXAMPLE :1 – Prototype with Familiar and Unfamiliar Navigation Elements

Aim :

The aim of this experiment is to create an interactive prototype using Proto.io with multiple screens such as Home, Profile, and Attendance. The prototype demonstrates screen navigation and includes both familiar and simple navigation elements to improve usability.

Example 1: Simple Prototype with Screen Navigation

Tool Used

Proto.io – https://proto.io/

Proto.io is an interactive prototyping tool used to design and test mobile application interfaces by adding screens, UI components, and interactions.

Procedure

Step 1: Sign Up and Login

- Open the Proto.io website.
- Create an account or log in with an existing account.

Step 2: Create a New Project

- Click Create New Project.
- Enter a project name.

- Select the device size.
- Click Create.

Step 3: Design the Home Screen

Created the main **Home Screen** with:

- Header containing logo EDU SERVE
- Navigation menu (Home, Login, Sign Up)

Added main options:

- Attendance
- Assignments
- Reminder

Added interaction:

- Clicking **Attendance** → navigates to Attendance Screen
- (Optional) Other buttons can be linked to respective screens

Step 4: Design the Profile Screen

- Created **Profile Screen** with:
  - Profile image placeholder
  - User details (Name, Roll No, Department)
- Designed three main sections:
  - Attendance
  - Assignments
  - Reminder
- Added navigation:
  - Clicking Attendance → Attendance Screen

Step 5: Design the Attendance Screen

- Created **Attendance Screen** showing subject-wise details:
  - Operating Systems – 97.8%
  - User Interface Design – 100%

    - Software Construction – 96.70%
    - Design Thinking – 93%
    - Soft Skills – 100%
- Displayed data clearly using text layout
- Added navigation option (Back/Home)

Step 6: Add Interactions

- Used Tap/Click interaction:
    - Home → Profile
    - Profile → Attendance
    - Attendance → Home/Profile
- Set action: Navigate to Screen

Step 7: Preview the Prototype

- Clicked Preview option
- Tested navigation between:
    - Home Screen
    - Profile Screen
    - Attendance Screen
- Ensured smooth transitions

Step 8: Share the Prototype

- Generated a shareable prototype link from Proto.io
- The prototype can be accessed and tested using the link

Example 2: Familiar and Unfamiliar Navigation Elements

Familiar Navigation Elements

These are commonly used and easy to understand:

- Navigation bar (Home, Login, Sign Up)
- Buttons (Attendance, Assignments, Reminder)
- Click-based navigation
- Structured layout

These improve usability because users are already familiar with them.

Unfamiliar Navigation Elements

(Not heavily used in this prototype, but can be added)

- Gesture-based navigation (swipe)
- Hidden menus
- Animated transitions
- Voice commands

These provide innovative interaction but may require user learning.

Result

The prototype was successfully created using Proto.io with multiple screens including Home, Profile, and Attendance. Navigation was implemented using interactive buttons, allowing users to move smoothly between screens.
