EXPERIMENT 5a

NAME: HARSHNI K

ROLL NO: 240701186

Aim :

To design and develop a mobile application interface for a Sports Shop using the Rapid Application Development (RAD) model and evaluate its usability.

OBJECTIVE

- To understand the RAD model
- To design interactive UI screens
- To implement navigation between pages
- To create a user-friendly application

RAD MODEL IMPLEMENTATION

---

1. Requirements Planning

The application requirements were identified, including user login, product browsing, and payment functionality.

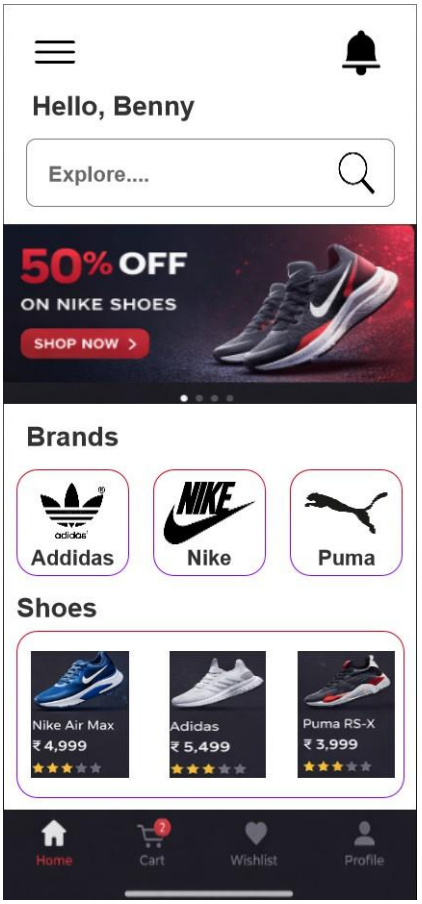
2. User Design

Home Page :

"Upon completing the required information and selecting 'Sign Up,' your SportX Trinity account will be created."

Interactions were added:

LOGIN -> Home Page



3. Rapid Construction :

Interactions were added:

Login → Home

Home → Product

4. Cutover

The application was tested and final output was verified.

Interactions were added:

- Login → Home
- Home → Product
- Product → Payment
